Programming Fundamentals

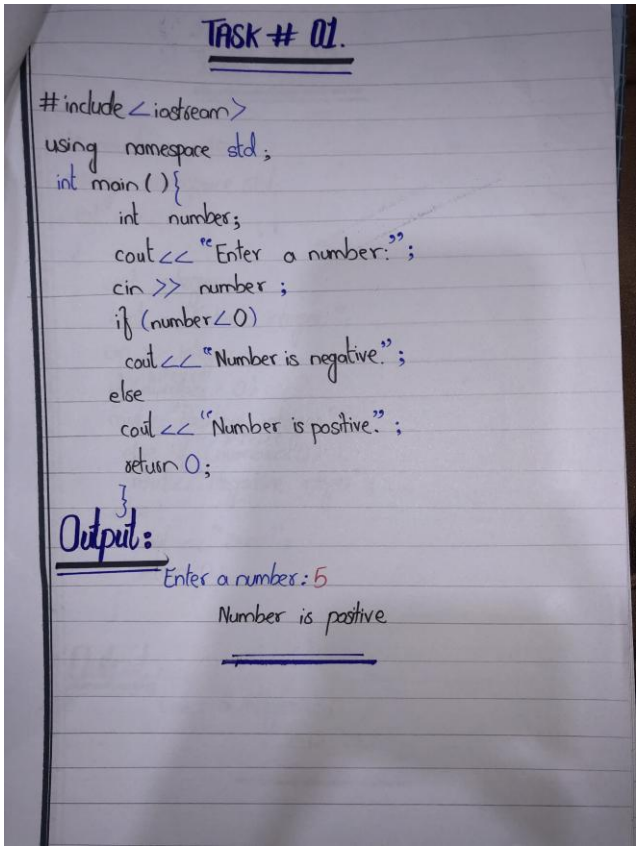

Lab 4 Submission	
Name	| Saleha Amjad |
Roll No	| TO BE ADDED |
Program	| BSCS – 1st Semester |
Section	(E)
Submitted To	|Sir Asad Majeed|
Date	|15 – 10 – 26 |

Lab Task 01

Write a program to print positive number entered by the user.

If the user enters negative number print number entered is positive otherwise print number is negative.

HANDWRITTEN :

CODE On Desktop :

```cpp
#include <iostream>
using namespace std;

int main()
{
    int number;

    cout << "Enter a number: ";
    cin >> number;

    if (number < 0)
        cout << "Number is negative"
    else
        cout << "Number is positive"

    return 0;
}
```

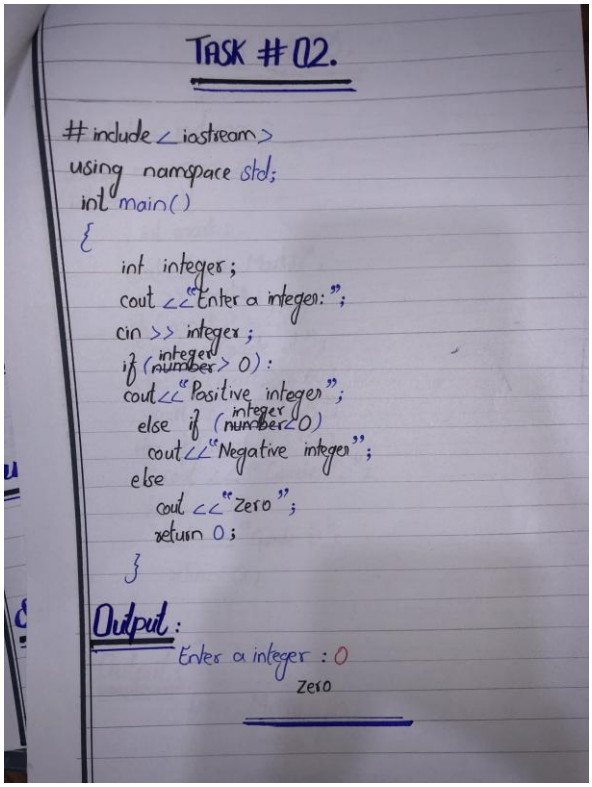

OUTPUT :

```
Enter a number: 5
Number is positive
--------------------------------
```

Lab Task 02

Program to check whether an integer is positive, negative or zero.

HANDWRITTEN :

CODE On Desktop :

```cpp
#include <iostream>
using namespace std;

int main()
{
    int number;

    cout << "Enter an integer: ";
    cin >> number;

    if (number > 0)
        cout << "Positive";
    else if (number < 0)
        cout << "Negative";
    else
        cout << "Zero";

    return 0;
}
```

OUTPUT :

```
Enter an integer: 0
Zero
--------------------------

Process exited after 7.702
```

Lab Task 03

Input : Mark

process : If mark greater than and equal to 75, score Will be A

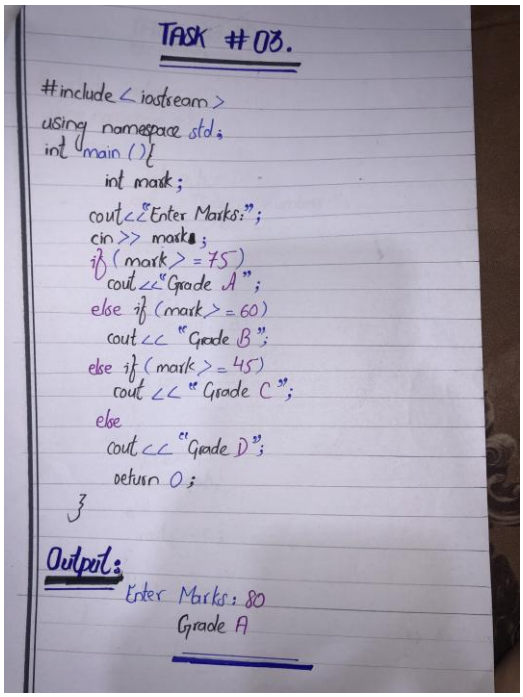

If mark less than 75 and greater than and equal to 60, score Will be B

If mark less than 60 and greater than and equal to 45, score Will be C

If mark less than 30, score Will be D

Output : print the grade Of your score.

HANDWRITTEN :

CODE On Desktop :

```cpp
#include <iostream>
using namespace std;

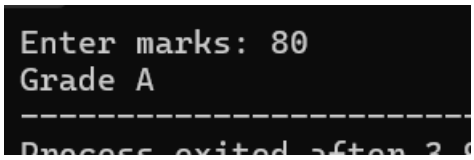

int main()
{
    int mark;

    cout << "Enter marks: ";
    cin >> mark;

    if (mark >= 75)
        cout << "Grade A";
    else if (mark >= 60)
        cout << "Grade B";
    else if (mark >= 45)
        cout << "Grade C";
    else
        cout << "Grade D";

    return 0;
}
```

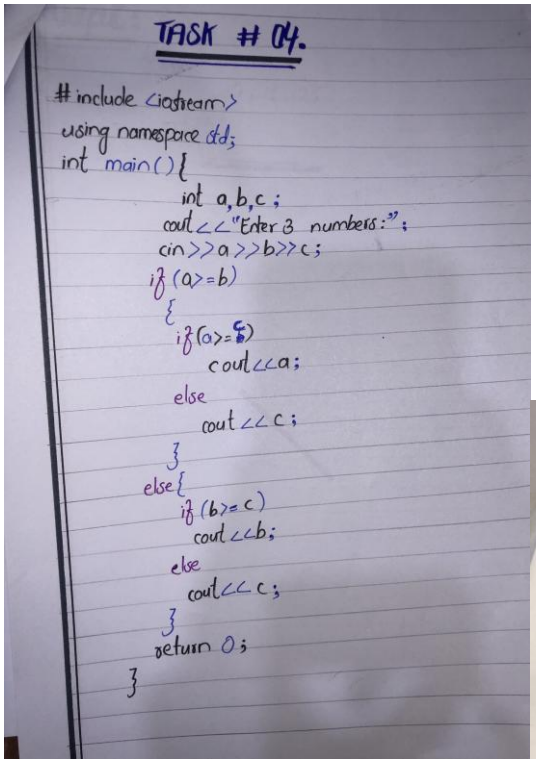

OUTPUT :

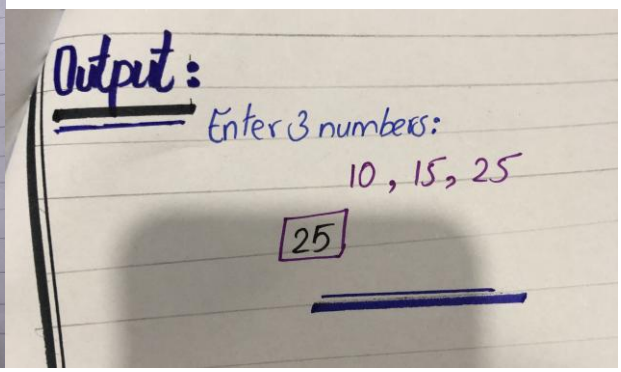

Lab Task 04

Find Largest Number Using Nested if...else Statement. Check whether the number entered by the user is positive or not. If it is positive then calculate how many digits the number have

HANDWRITTEN :

CODE On Desktop :

sk 4.cpp

```cpp
#include <iostream>
using namespace std;

int main()
{
    int a, b, c;

    cout << "Enter three numbers: ";
    cin >> a >> b >> c;

    if (a >= b)
    {
        if (a >= c)
            cout << a;
        else
            cout << c;
    }
    else
    {
        if (b >= c)
            cout << b;
        else
            cout << c;
    }

    return 0;
}
```

OUTPUT :

```
Enter three numbers: 10 15 25
25
```
